### DETAILED ACTION

1. Applicants' Response to Office Action, received 29 October 2007, is acknowledged.

Claims 8-10 and 15-20 have been canceled.

2. Claims 1-7 and 11-14 are pending and under consideration.

### Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-7, and 11-14 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Shimada et al (*Rinsho Byori*, Vol. 50, No. 5, pages 528-532, May 2002).

The instant claims are drawn to a method of detecting microorganism DNA comprising amplifying cDNA with bioreactive primers, hybridization with probes attached to magnetic beads, adding enzyme complex which reacts with a luminescence-emission substrate, washing the reaction components, and detecting light-emission.

According to the abstract of the cited reference, Shimada et al teach a method of detecting microorganism DNA (*M. tuberculosis*) comprising amplifying cDNA with bioreactive primers, hybridization with probes attached to magnetic beads, adding enzyme complex which reacts with a luminescence-emission substrate, washing the reaction components, and detecting light-emission.

At this time, the examiner is waiting for a copy of the entire reference. The examiner apologizes for any inconvenience to the inventors, but there has been a delay in receiving the document. Once received, the examiner will forward a copy of the document as well as reassess the applicability of the cited reference as prior art.
